

# PROPOLSAVE®

## Introduction:

Propolsave® a NEW and UNIQUE product, which contains a multi-acting combination of highly purified and characterized polyphenols derived from Propolis, and Opunxia™, a natural mucoprotective extract from the Opuntia ficus indica plant. Propolis extract is prepared by a proprietary technology, developed by B Natural (M.E.D.- Multi Dynamic Extraction) that allows to obtain a highly purified, characterized and standardized extract that preserves all the original polyphenols of Propolis. Opunxia™ is produced by specialized techniques that guarantee the natural composition of the mucilages contained in the cactus “leaf”. Propolsave® acts as a protective barrier for mucosae tissue and as an antibacterial, antifungal and anti-inflammatory natural compound.

## Effects:

- Wound healing
- Protective effect in inflammatory condition
- Antimicrobial activity
- Antifungal activity
- Mucoprotective effect in several tissues (oral, vaginal, ...)

## Applications:

- **PROPOLSAVE® Powder:** Microencapsulated powder suitable for all solid dosage forms such as powders, granules in sachet, tablets, effervescent, candies, vaginal suppository.
- **PROPOLSAVE® Hydroglyceric:** suitable for liquid forms such as spray, syrups, vaginal douche, etc.

## Dosages:

- **For oral spray:** 8-15 mg/day of M.E.D. polyphenols corresponding to 0.65-1.25 ml of Propolsave hydroglyceric extract
- **For oral tablets:** 12-24 mg/day of M.E.D. polyphenols corresponding to 200-400 mg of Propolsave Powder.
- **For Intimate cream:** 0.8-1 mg/ml corresponding to 6-7% of Propolsave hydroglyceric extract (antimicrobial activity).

## Equivalence:

- 6 mg of M.E.D. polyphenols corresponding to 100 mg/ml of Propolsave Powder
- 6 mg corresponding to 1 ml of Propolsave hydroglyceric extract

---
