

CETO3[®]

Introduction:

CETO3[®] is a product containing refined fish oil glycerides coming from North Atlantic pelagic fish without fishy smell or taste and without causing reflux or burning. It's immediate processing secures a fresh product with unique sensory qualities and without using any solvent or chemical. The product has a very low quantity of environmental pollutants. CETO3[®] contains Cetoleic acid (Omega-11) and Omega-3 which unlike traditional fish oils, stimulates the body's own production of EPA and DHA.

Effects:

- Stimulates the production of EPA and DHA in humans liver.
- Able to raise EPA and DHA levels more efficiently than traditional omega-3 oil via the conversion of ALA.
- Reduction of redness in the skin.

- CETO3[®] delivers equal Omega-3 index compared to fish oil .
- Cetoleic rich fish oils or concentrates results in lower circulating Total cholesterol concentration in rodents.
- Cetoleic acid promotes the conversion of alpha-linolenic acid (ALA) in Omega -3.

Uses:

- **Cardioprotective:** Decreases cardiovascular risk
- **Joint Health:** Due to the anti-inflammatory effect
- **Skin Health (Eczema and psoriasis)**

Suggested dose:

- 2000-4000 mg/day for skin disorders
- 1000-2000 mg / daily for cardiovascular diseases
